FULL-STACK DEVELOPER: REACT, NEXT.JS, NODE.JS, FASTAPI & LLM FEATURES

Full stack developer with 1.5 years of owning features end to end, from database schema and API through to a polished, responsive UI, and then deploying and monitoring them. Builds React/Next.js front ends in TypeScript and Node.js/Express REST APIs on PostgreSQL with Prisma, with automated tests and CI/CD auto-deploys on Vercel, AWS and Docker. Has shipped **PostDrip**, a live SaaS product (live demo), as sole developer. At CETIZION Verifica, turned business requirements into production software that **improved system performance by 30%** and **cut manual HR effort by 80%**. Clear communicator with a reliable remote-work setup.

SKILLS

Frontend: React 19, Next.js 16 (SSR/SSG), TypeScript, JavaScript, Tailwind CSS 4, shadcn/ui component library, Responsive Design, Chart.js

Backend and Data: Node.js, Express.js 5, REST API design, PostgreSQL with Prisma ORM 7, MongoDB, MySQL, data modeling, Background Job Queues, Webhooks, Python/FastAPI

Auth and Security: OAuth 2.0 (Google, Instagram, Facebook, LinkedIn), JWT with refresh-token rotation, RBAC

Testing and CI/CD: Vitest, pytest, 80% coverage gates, CI/CD auto-deploy on push, ESLint, Postman

Cloud and Deployment: AWS, Docker, Vercel, Neon (serverless Postgres), Cloudinary, Git, GitHub

WORK EXPERIENCE

CETIZION Verifica **05/2025 – Present**

Jr. Software Developer

- Built **PlanetPulse Minutes** end to end: **Next.js 16 + React 19** TypeScript web app plus Python/FastAPI service with OAuth sign-in and calendar sync, an **80% test-coverage gate**, Dockerized and **auto-deployed on push**.
- Owned full stack features with React.js, Node.js and MongoDB across multiple internal modules, from data model and REST API to UI, **improving system performance by 30%**.
- Automated end-to-end **payslip generation** from the database, **reducing manual HR effort by 80%** and minimizing payroll errors.
- Delivered questionnaire and reporting systems (REST APIs + Chart.js) and workflow automation that cut proposal turnaround time, translating product requirements into working software.

Tejo Tech Group **01/2025 – 03/2025**

Web Developer Intern

- Built a responsive React UI for the **Flaresens fire detection platform**, **improving load time by 20%**; created reusable components with HTML5, CSS3 and Tailwind CSS.

PROJECTS

- **PostDrip: AI Social Media Post Drip Platform** (Live Demo | GitHub): shipped business-facing SaaS, built solo end to end. **Next.js 16 + React 19 + Tailwind** UI; **Express 5 + Prisma 7 + PostgreSQL** API and schema; background job queue for scheduled publishing; OAuth for 4 platforms, refresh-token rotation, login lockout and workspace roles; Gemini/Claude AI generation. Deployed on Vercel and Neon.
- **PlanetPulse Minutes** (CETIZION): webhook-driven pipeline (HMAC-verified) with S3-compatible storage, schema-validated AI meeting minutes and email delivery; ~$0.30 per 2-hour meeting.
- **SBO (Safety Behavioral Observation) App:** real-time mobile app with image upload, location mapping and dashboards. React Native (Expo), Node.js, MongoDB.

EDUCATION

Manav Rachna University | B.Tech in Computer Science and Engineering | Led a team of 6+ devs **2021 – 2025**

Kamal Public Senior Secondary School | Higher Secondary (XII): 76.4% | Secondary (X): 80% **2018 – 2021**
